Re: Silver Springs #1 Dam Repair UT00180

On November 21, 2006, Matt Lindon of our Dam Safety staff performed a Final Inspection on Silver Springs Dam #1. The work appeared substantially complete and acceptable. This letter will serve as official notice of our acceptance of the project, pursuant to Section 73-5a-304 of the Utah Code annotated 1953, as amended. As a condition of approval, "as-constructed" drawings must be submitted to this office within 60 days of the date of this letter. These drawings should be clearly marked, and can be submitted electronically in a ".pdf" format. Alternatively, they can be submitted on a high quality mylar or sepia medium.

We would recommend locking down the trash racks and gates on each standpipe to prevent vandalism. We also recommend putting at least a nominal amount of water against these new gates to test them before filling again in the spring. Please have your engineer send to us the As-Built drawings for our files, either in paper or .pdf format.

We appreciate your efforts on this project and have enjoyed working with you. If you have any further questions or comments, please do not hesitate to contact Matt Lindon or myself at 801-538-7372.

Sincerely,

Jerry D. Olds, P.E.  
State Engineer
